

# PRESS RELEASE

## Service Stations for Ships 2010

Suppliers for spare parts, service, repair and maintenance worldwide

The **updated 2010 Edition** of the indispensable guide for the ship's commands, inspection and purchase department is now available: **Service Stations for Ships and Repair Facilities at Shipbuilding Yards**.

One can quickly and reliably find **worldwide addresses of 20 renowned ship suppliers** for spare parts, service, repair and maintenance. No extensive and time consuming research is needed any longer, irrespective where the vessel is presently operating. This not only helps saving time but also costs.

In the **yellow part** of the handbook addresses of **European repair yards** are listed including their service range and contact partners.

The information is also available on the website **www.myshiptservice.com**. The database allows numerous search options: services, countries, harbours or products – from „air condition“ to „turbocharger“.
